What is ML?

A computer program is said to learn from experience E with respect to some class of tasks T and performance measure P if its performance at tasks in T, as measured by P, improves with experience E.

- Tom M. Mitchell, 1998

Example Machine Learning problem

- Program for spam detection

Example Machine Learning problem

- Program for spam detection
  - Task T: classifying an email into spam vs. non-spam

Example Machine Learning problem

- Program for spam detection

  - Task T: classifying an email into spam vs. non-spam

  - Experience E: observing the users label the emails as spam vs. non-spam

DiL
Data-driven Intelligence & Learning Lab

Example Machine Learning problem

- Program for spam detection

  - Task T: classifying an email into spam vs. non-spam

  - Experience E: observing the users label the emails as spam vs. non-spam

  - Performance P: fraction of email that are correctly detected

Experience

Experience

Dear Beloved Friend,

I know this message will come to you as surprised but permit me of my desire to go into business relationship with you.

I am Miss ██████████ a daughter to late ██████████ of Libya whom was murdered during the recent civil war in Libya in March 2011, before his death my late father was a strong supporter and a member of late Moammar Gadhafi Government in Tripoli. Meanwhile before the incident, my late Father came to Cotonou Benin republic with the sum of USD4, 200,000.00 (US$4.2M) which he deposited in a Bank here in Cotonou Benin Republic West Africa for safe keeping.

I am here seeking for an avenue to transfer the fund to you in only you're reliable and trustworthy person to Investment the fund. I an here in Benin Republic because of the death of my parent's and I want you to help me transfer the fund into your bank account for investment purpose.

Please I will offer you 20% of the total sum of USD4.2M for your assistance. Please I wish to transfer the fund urgently without delay into your account and also wish to relocate to your country due to the poor condition in Benin, as to enable me continue my education as I was a medical student before the sudden death of my parent's. Reply to my alternative email: ██████████████, Your immediate response would be appreciated.

Remain blessed,

Miss ██████████

Types of Machine Learning

Peng et al. 2021

Supervised Learning

Supervised Learning

- Supervised learning techniques
  - p features $X^1, X^2, X^3, \ldots X^p$ measured on N observations

Supervised Learning

- Supervised learning techniques
  - p features X^1, X^2, X^3, ... X^p measured on N observations
  - Response (t) also measured on these

Supervised Learning

- Supervised learning techniques
  - p features $X^1, X^2, X^3, \ldots X^p$ measured on N observations
  - Response (t) also measured on these
  - → goal is to predict t using $X^1, X^2, X^3, \ldots X^p$

Supervised Learning

Finding a function f such that $f(x) \cong t$ for all known and unknown samples (x, t)

Unsupervised learning

Unsupervised learning

- Only have a set of features $X^1, X^2, X^3, \ldots X^\rho$

Unsupervised learning

- Only have a set of features $X^1, X^2, X^3, \ldots X^p$

- Not interested in prediction (don't have an associated t)

Unsupervised learning

- Only have a set of features $X^1, X^2, X^3, ... X^p$

- Not interested in prediction (don't have an associated t)

- → goal is to discover "Interesting things" about the data
